# Systematic Review - Guide

# Agenda

1 Introduction to the systematic review

2 Planning

3 Conduct

4 Merger

# 1. Introduction to the systematic review

**What is a systematic review?**

A specific methodology for identifying, selecting and evaluate their contribution, summarise them and, finally, present them in such a way that conclusions can be drawn in a reasonable manner (cf. Denyer & Tranfield, 2009).

# 1. Introduction to the systematic review

## Where does the systematic review come from?

- The approach has its origins in medicine (see Denyer & Tranfield, 2009).
- Cochrane, the father of evidence-based medicine, used the method to systematically describe medical interventions (cf. Mulrow, 1994).

- *"It is certainly a significant criticism of our profession that we have not organised a critical, periodically updated summary of all relevant randomised controlled trials organised by specialist field or* sub-field" (cf. Archie Cochrane, 1979).

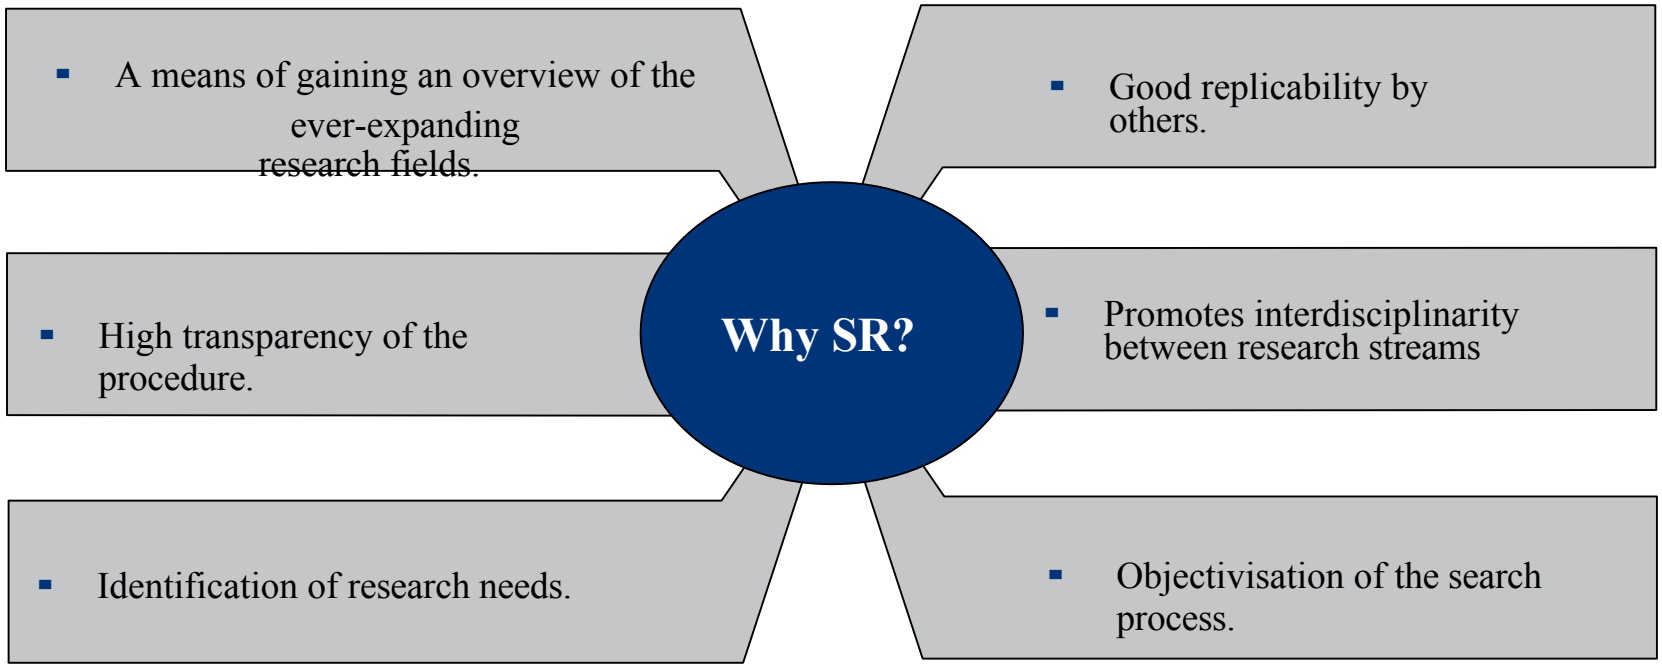
# 1. Introduction to Systematic Reviews

## Systematic Review in Business Administration

- These tasks are clearly not limited to medicine (see Petticrew 2001: 99).
- Tranfield et al. (2003) were the first to outline the systematic review for management and organisational studies (cf. Schulze 2015).

# 1. Introduction to the systematic review

- **Why systematic reviews?**



# 2. Advance planning

## A systematic review can generally be divided into three phases

**1. Advance planning** → **2. Implementation** → **3. Results**

- Precise definition of the objective.
- Scoping of three to five papers (synonym: publications) to read through.
- Determination of the research question or keywords and their synonyms to be explored during the course of the study.

- A structured approach.
- The identification of relevant literature
  - using explicitly reproducible criteria that make inclusion and exclusion criteria transparent,
  - supported by an assessment and weighting of the quality of the selected studies based on their dissemination and reporting.
- Thorough review.
- Focused review of the selected research papers.

- Synthesis involves the process of bringing together the parts from individual texts to form a whole that should be greater than the sum of its parts (Denyer–Tranfield et al. 2009).

Source: Han - Data Mining Concepts and Techniques 3rd Edition - 2012 Page 130

# 2. Advance planning

1. Advance planning → 2. Implementation → 3. Results

## Planning

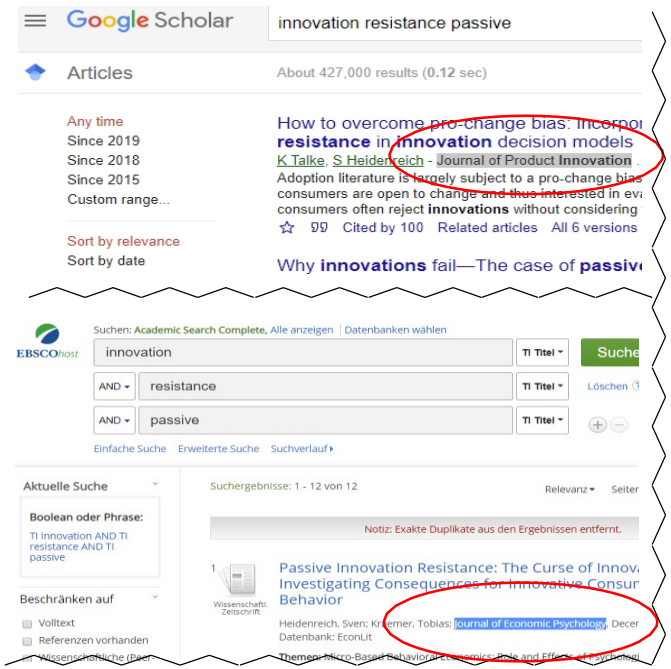
Implementation

- Precise definition of the objective / research question
- Scooping: brief familiarisation

Review 3–5 high-quality papers on the topic / selected objective.

Use Google Scholar or one of the databases, such as EBSCOhost Web, Web of Science or ScienceDirect.com.

Select and copy the journal



# 2. Planning ahead

**1. Planning** → **2. Implementation** → **3. Results**

## Implementation
## What is good?

Check the journal rankings in the complete list on vhbonline.org.
The quality of the journals is classified as:

- A+ (high)

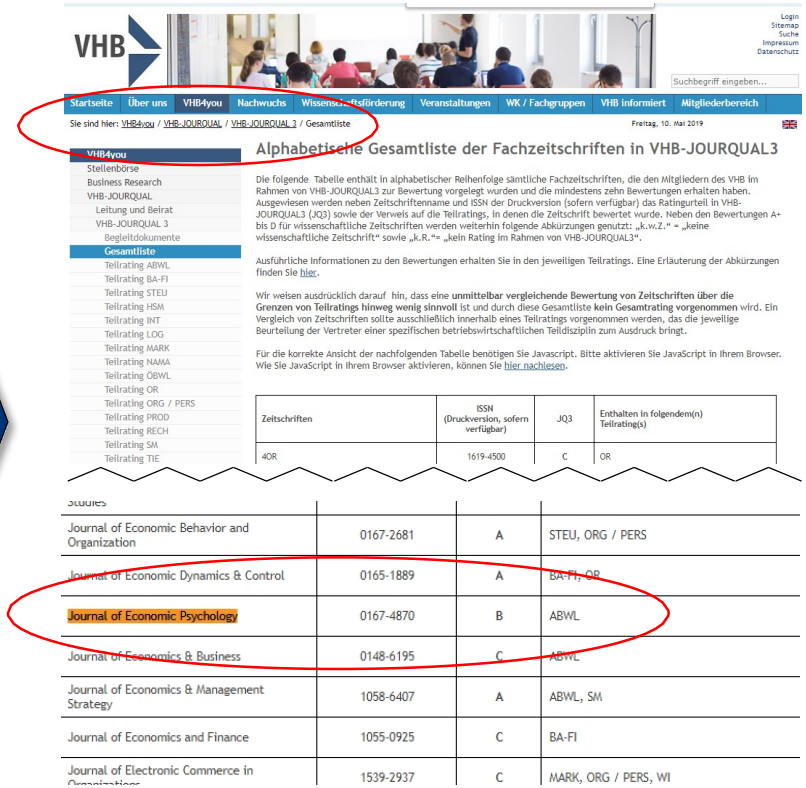
to

- E (low, but still in the ranking)

and

- k.R. (no ranking).

CTRL+F search and journal insert.



# 3. Implementation

1. Planning → 2. Implementation → 3. Results

## Automatic search

- Abstracts and topic search.
- All relevant databases using the same research question, or keywords (EBSCOhost Web, Web of Science, ScienceDirect.com).
- Identification and selection of relevant publication media, e.g. databases.
- No time restriction on the search.
- Scientific journals and peer-reviewed journals.

## Search objective

- Through an iterative process, 50–100 sources.

## Manual search

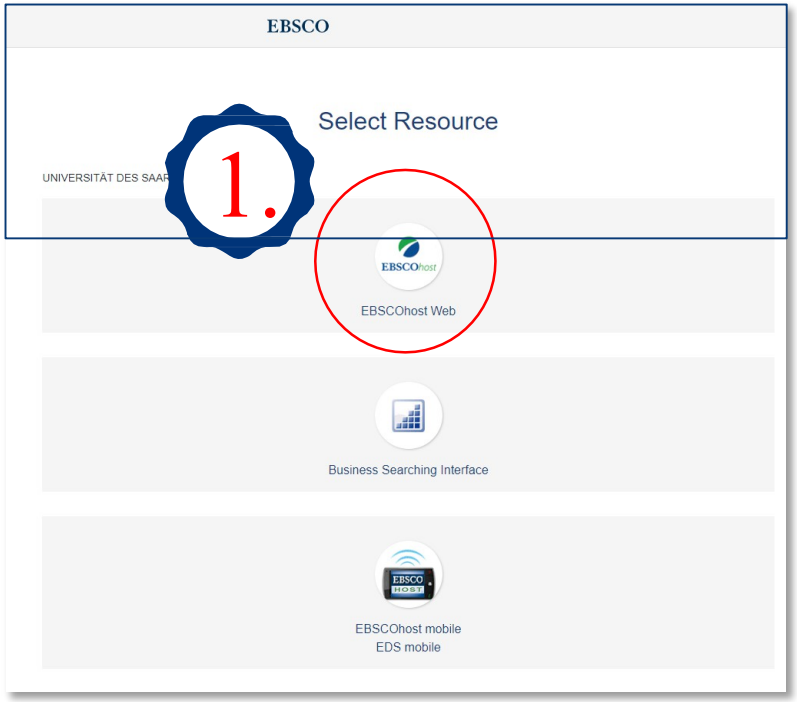
- At the end, the identified publications, a forward and backward search is carried out, i.e. the references of the publications are searched and it is determined whether the publication itself has been cited.

# 3. Implementation: Academic platform: EBSCO Host

1. Advance planning → **2. Implementation** → 3. Results

## EBSCO Host

- Establish a VPN connection with the UDS and Search for EBSCO (Login).
- 1. Select EBSCOHost Web.

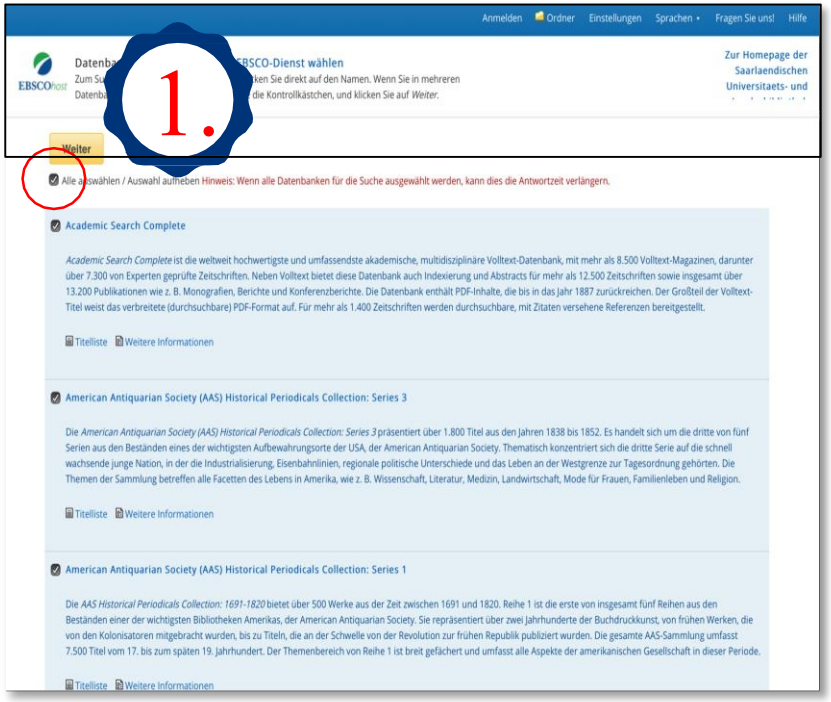


# 3. Procedure: Academic platform: EBSCO Host

1. Planning → **2. Implementation** → 3. Results

## EBSCO Host

- 1. Select all and click Next ✓ .

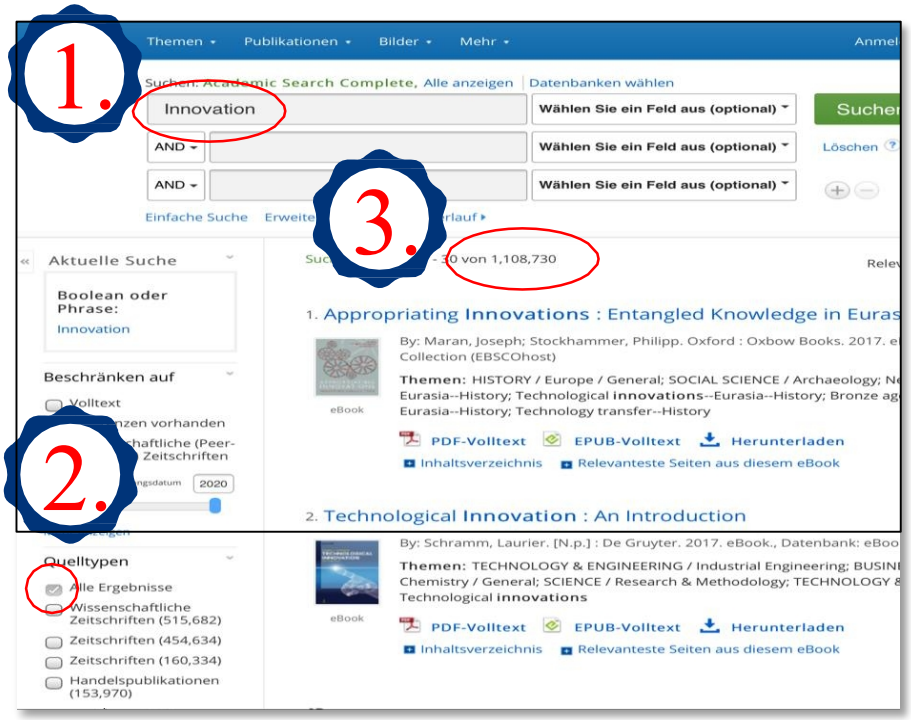


# 3. Implementation: Academic platform: EBSCO Host

1. Planning → **2. Implementation** → 3. Results

## EBSCO Host

1. Enter search term(s).
2. Select all source types ✓ .
3. Excluding optional field: 1,108,730 hits for the search term ‘Innovation’.

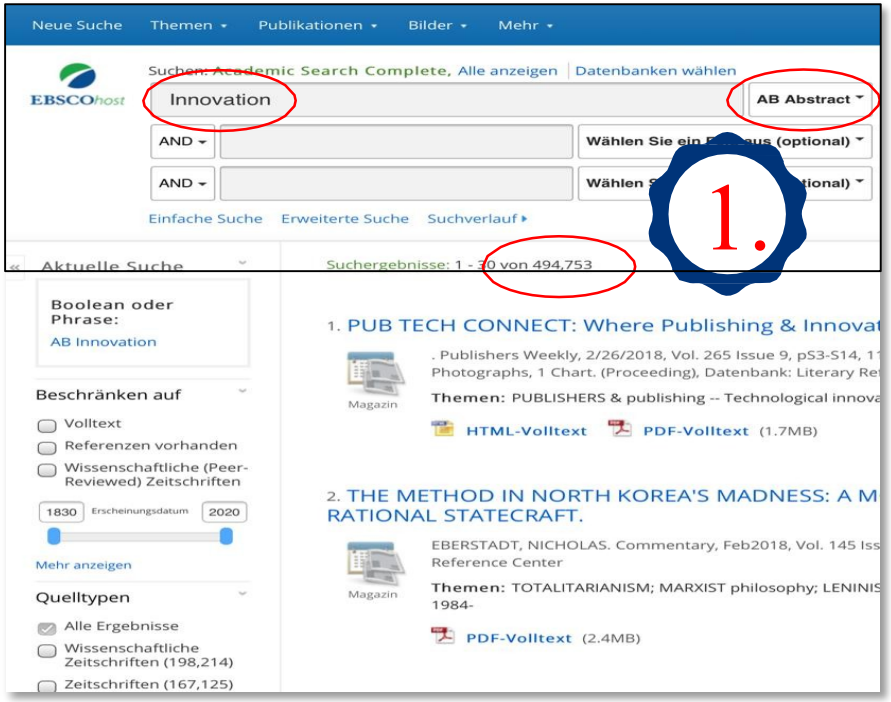


# 3. Implementation: Research platform: EBSCO Host

1. Advance planning → **2. Implementation** → 3. Results

## EBSCO Host

1. Selected in the optional ‘Abstract’ field reduces the hits to 494,753.

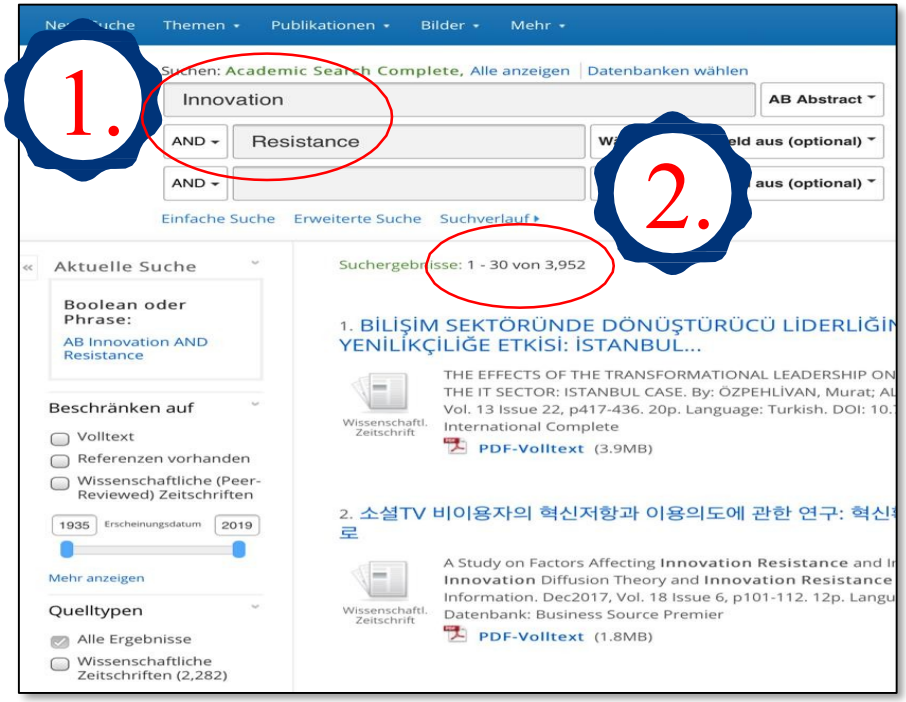


# 3. Implementation: Academic platform: EBSCO Host

1. Advance planning → 2. Implementation → 3. Results

## EBSCO Host

1. Search term 'Resistance' linked with 'Innovation' using AND.
2. Search results reduced to 3,952.

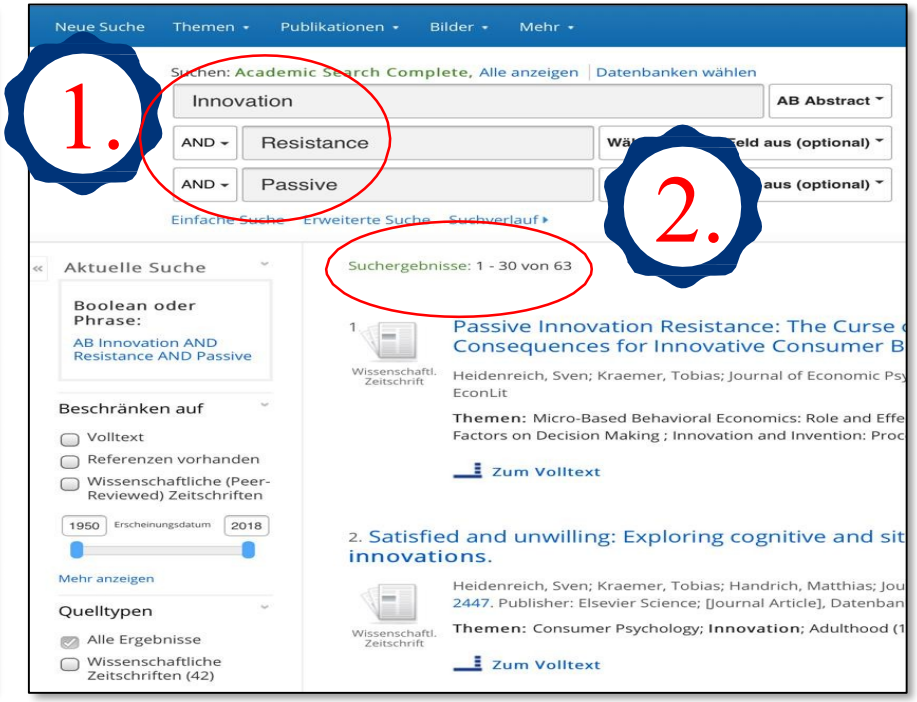


# 3. Implementation: Academic platform: EBSCO Host

1. Advance planning → 2. Implementation → 3. Results

## EBSCO Host

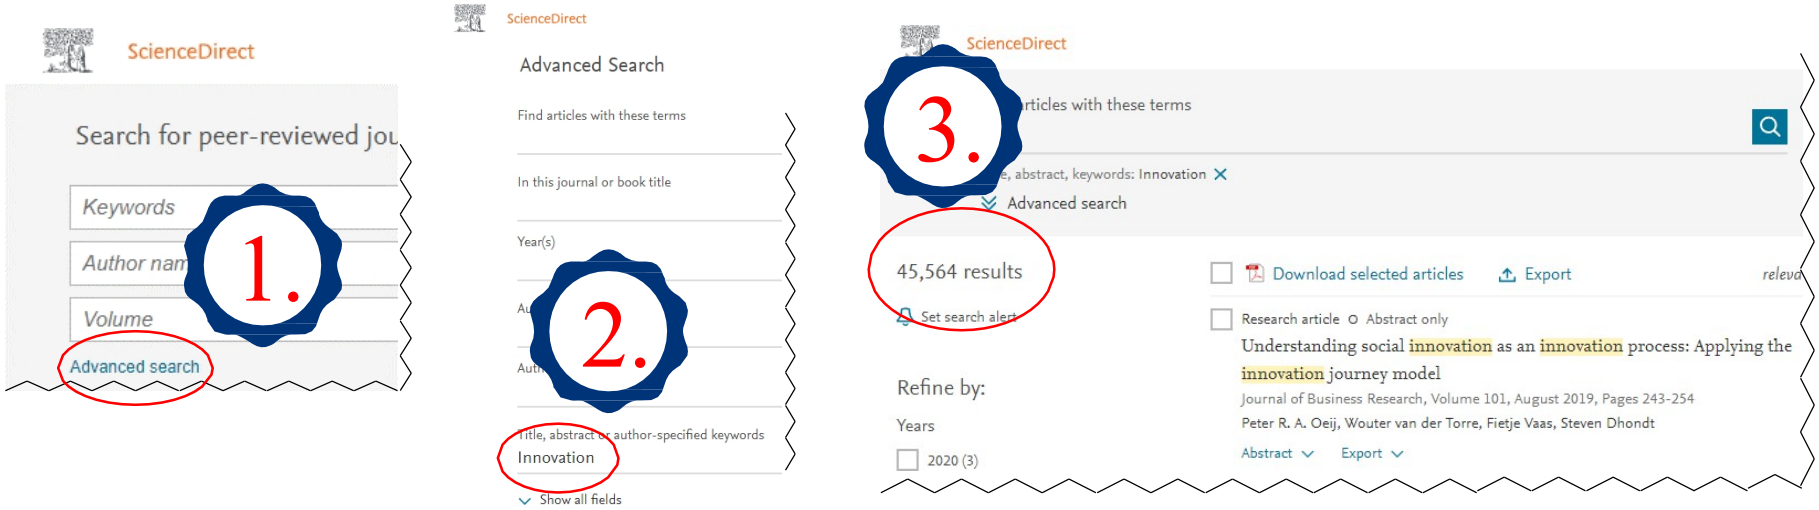
1. Innovation AND Resistance AND Passive.
2. 63 results.



# 3. Implementation: Science platform: ScienceDirect

1. Advance planning → **2. Implementation** → 3. Results

**www.ScienceDirect.com**

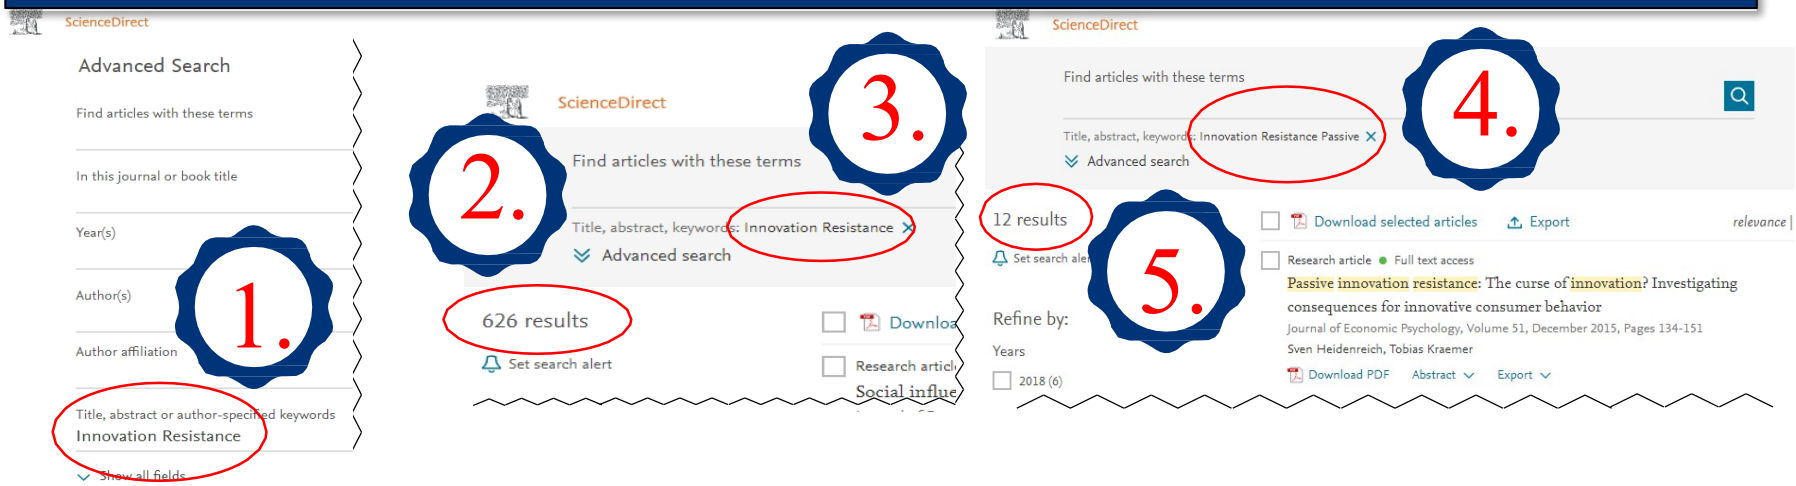


1. Advanced search.
2. Enter search term in Title, Abstract or Author search.
3. Innovation returns 45,564 results.

# 3. Implementation: Science platform: ScienceDirect

1. Advance planning → **2. Implementation** → 3. Results

www.ScienceDirect.com

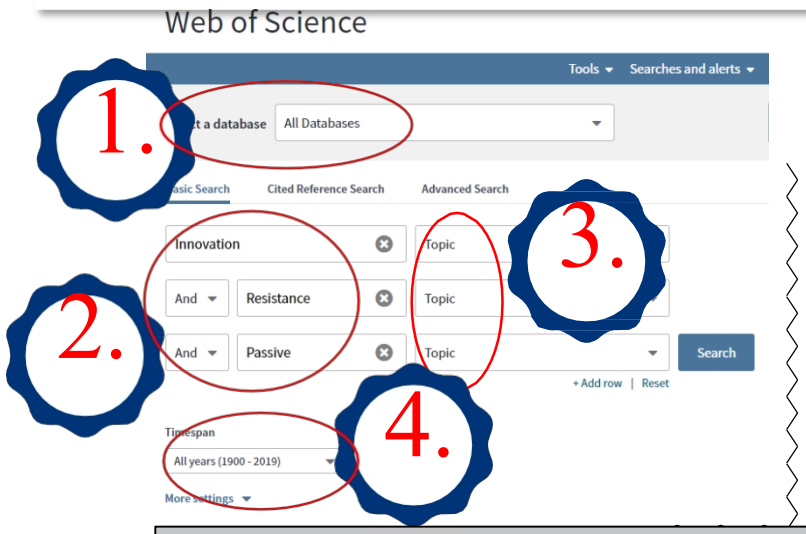


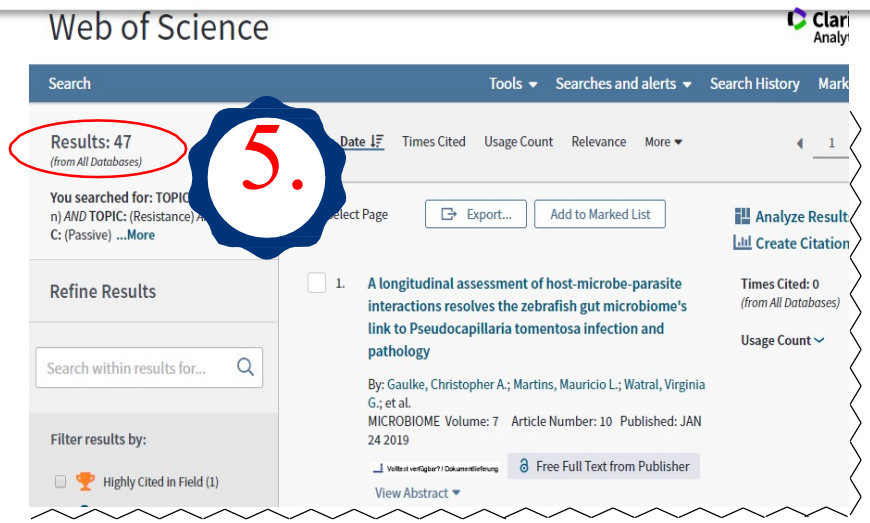
1. Search term supplemented with 'Resistance'.
2. Enter “Innovation” & “Resistance”
3. Result: 626 hits.
4. Enter ‘Innovation’ & ‘Resistance’ & “Passive”
5. Result: 12 hits.

# 3. Implementation: Science platform: Web of Science

1. Advance planning → **2. Implementation** → 3. Results

## Web of Science





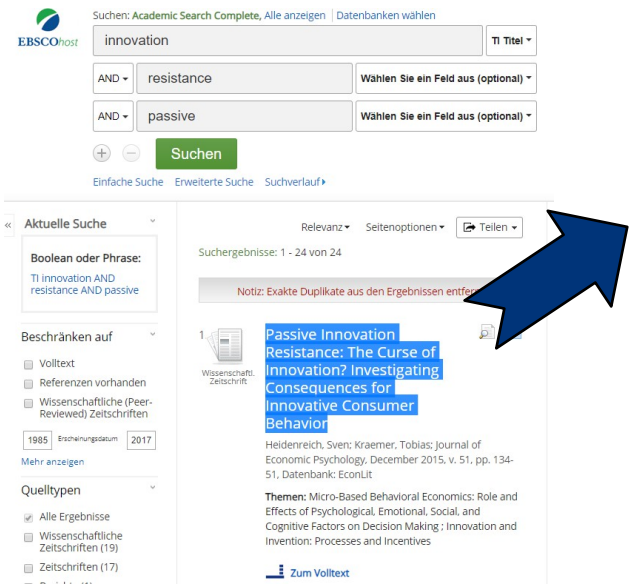
1. Select All Databases.
2. Enter “Innovation” & “Resistance” & ‘Passive’.
3. Topic or abstract search.
4. Limit by year only if explicitly required.
5. The result is 47 hits.

# 3. Implementation: Data transfer: EXEL

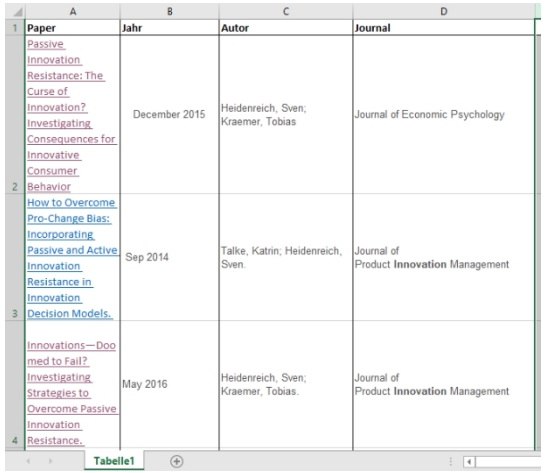
1. Preliminary planning → **2. Implementation** → 3. Results

## Execution
## Implementation

- Transferring search results using the example of EXEL.



EXEL Table 1



| | A | B | C | D |
|---|---|---|---|---|
| 1 | Paper | Jahr | Autor | Journal |
| 2 | Passive Innovation Resistance: The Curse of Innovation? Investigating Consequences for Innovative Consumer Behavior | December 2015 | Heidenreich, Sven; Kraemer, Tobias | Journal of Economic Psychology |
| 3 | How to Overcome Pro-Change Bias: Incorporating Passive and Active Innovation Resistance in Innovation Decision Models. | Sep 2014 | Talke, Katrin; Heidenreich, Sven. | Journal of Product Innovation Management |
| 4 | Innovations—Doomed to Fail? Investigating Strategies to Overcome Passive Innovation Resistance. | May 2016 | Heidenreich, Sven; Kraemer, Tobias. | Journal of Product Innovation Management |

Tabelle1

Start on a database site, e.g. EBSCOhost.com. Read the abstracts of the first paper and, if it is relevant to the topic, transfer the title, year, author, journal in which it was published, etc. into Excel.

# 3. Implementation: Data transfer: Excel

1. Advance planning → **2. Implementation** → 3. Results

**Implementation**

## Implementation

- New table in EXEL to eliminate duplicate hits from the individual databases.
- Here, for example, a duplicate in EBSCOhost Web and ScienceDirect.com.

| 3 | Passive Innovation Resistance: The Curse of Innovation? Investigating Consequences for Innovative Consumer Behavior | December 2015 | Heidenreich, Sven; Kraemer, Tobias | Journal of Economic Psychology |

- Green: The content of the paper is relevant to the research question.
- Yellow: The paper says something about the research topic, but the information is more useful for the introduction or as a side note in one's own work.
- Red: The paper provides no information whatsoever on the research question.
  **Example:** Another research discipline, e.g. biology or medicine, defines the term to mean something else.

# 3. Procedure: Forward and backward search

1. Advance planning → **2. Implementation** → 3. Results

**Implementation**

**Implementation**

- Example of a forward backward search of "green" paper.
- Promising results should also be
  the traffic light system
  and add them to an Excel spreadsheet.

2. Conceptual development and research model

2.1. Passive innovation resistance

According to a systematic literature review of Heidenreich and Handrich (2014), previous literature differentiates two types of consumers' resistance to innovation: active and passive innovation resistance. Active innovation resistance represents a negative attitude formation driven by innovation-specific factors that evolves during new product evaluation (e.g., Kuisma et al., 2007, Laukkanen et al., 2009, Nabih et al., 1997). When evaluating new products, consumers form their attitude toward an innovation based on its attributes (Talke & Heidenreich, 2014). In case some of the

# 4. Summary: Results: Descriptive analysis

1. Planning → 2. Implementation → **3. Results**

## Presentation of results

Implementation

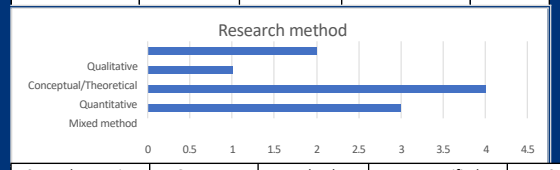
Can be divided into two parts:

- Descriptive analysis
- Synthesis (or interpretative analysis)

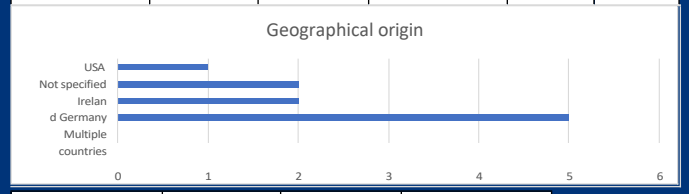
1. Descriptive analysis: the descriptive section of the previously identified results.

- The presentation can be organised, for example, according to:
  - Journals and their year of publication.
  - The study method:
    - qualitative,
    - quantitative,
    - theoretical-conceptual (literature review),
    - mixed methods,
    - Literature review.
  - Geographical distribution of the studies
  - Company size
  - Industrial sector
  - Research focus

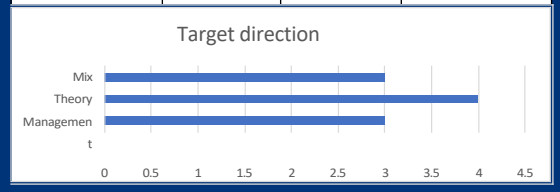
| Mixed-method | Quantitative | Conceptual/Theoretical Theoretical | Qualitative | Σ |
|---|---|---|---|---|
| 3 | 4 | 1 | 2 | 10 |



| Several countries | Germany | Ireland | Not specified | USA | Σ |
|---|---|---|---|---|---|
| 0 | 5 | 2 | 2 | 1 | 10 |



| Management | Theory | Mix | Σ |
|---|---|---|---|
| 3 | 4 | 3 | 10 |



# 4. Consolidation: Results: Synthesis

1. Advance planning → 2. Implementation → **3. Results**

**Objective: Structuring of the study content**

## Phänomen

- What types and components are there of resistance to innovation?

## Antecedents

- What drivers/barriers are there for resistance to innovation?

## Effekte

- What are the consequences of resistance to innovation?

Source: Based on Schmeisser, 2013

# 4. Consolidation: Results: Synthesis

**1. Advance planning** → **2. Implementation** → **3. Results**

## Phnomen

- What types and components of innovation resistance?

Source: Adapted from Schmeisser, 2013

- Definitions (Authors X, Y)
- Status quo, satisfaction, etc. (Talke & Heidenreich, 2014)

## Antecedents

- What are the drivers/barriers to innovation resistance?

- Emotions (Author XY)
- Fatigue (Author XY)

## Effe kte

- What are the consequences of resistance to innovation?

- 50% of product innovations fail to gain a foothold in the market (Castellion and Markham, 2013).

# 4. Consolidation: Synthesis: Application example

1. Advance planning → 2. Implementation → 3. Results

## Not effective

*Ram and Jung (1991) describe that employees in organisations with a higher level of expertise exhibit lower resistance to innovation. Later, Talke and Heidenreich (2014) demonstrate that consumers, situation-specific factors such as satisfaction with the status quo can reduce the acceptance of innovations. However, resistance to innovation can be overcome through strategies such as product demonstrations (Heidenreich and Krämer, 2016). (Heidenreich and Krämer, 2016).*

## Unclear

The issue here, in concrete terms, without needing to know anything about resistance to innovation:

- An unstructured list of course content.
- Organisations do not suit consumers.
- Satisfaction with the status quo is just one of many dimensions of resistance to innovation. The rest are missing here.
- Does this strategy suit consumers, organisations, status quo satisfaction, or even to other forms of resistance?
- The remaining strategies are missing.

## Goal-oriented

Structured summary of relevant content.

- List phenomena with their sources:
  - What types and components of resistance to innovation are there?
- List the antecedents and their sources:
  - What are the drivers/barriers to resistance to innovation?
- List the effects and their sources:
  - What are the outcomes of resistance to innovation?
